Profile

I have 7+ years of experience as mobile and web development using various technologies. I have developed IT solutions using agile methodologies and frameworks such as SCRUM. I have experience in various programming languages such as C++, Java, JavaScript, TypeScript, Swift, Kotlin, PHP, Dart, C#, and Python. I consider myself a lover of development and an enthusiastic researcher to learn new technologies. I am currently doing a PhD with a line of research in advanced computational intelligence. I teach Python at the CISCO academy of the University of San Francisco de Quito. In addition to my professional training, I was self-taught as a videogame developer in Unity, with which I have published 3 videogames for mobile platforms.
